LABORATORIO / LABORATORY

Nuestros técnicos, pueden analizar de forma rápida y sencilla cualquier producto de iluminación LED

Our technicians can quickly and easily analyse any LED lighting product.

El mercado de la iluminación LED crece a un ritmo muy rápido y las necesidades de los clientes cambian constantemente demandando productos con mayor rendimiento y calidad, que ofrezcan más lúmenes por vatio consumido, lo que favorece al lanzamiento y aparición de nuevos productos.

Como parte de nuestra decidida apuesta por la iluminación LED y nuestros esfuerzos en I+D, hemos incorporado un laboratorio de fotometría propio, con una esfera de Ulbricht con la que realizamos ensayos y test de todos nuestros productos para garantizar la fiabilidad y calidad de nuestras soluciones en iluminación LED.

Análisis: Nuestros técnicos, pueden analizar de forma rápida y sencilla cualquier producto de iluminación LED, propio o de la competencia, obteniendo un Test Report con los principales datos técnicos del producto.

Entre ellos, los más comunes utilizados para comparar el rendimiento del producto, son:

- Potencia (Vatios)
- Temperatura. (K°)
- Flujo Lumínico (Lm)
- Índice cromático (CRI)
- Factor de potencia (P.F)

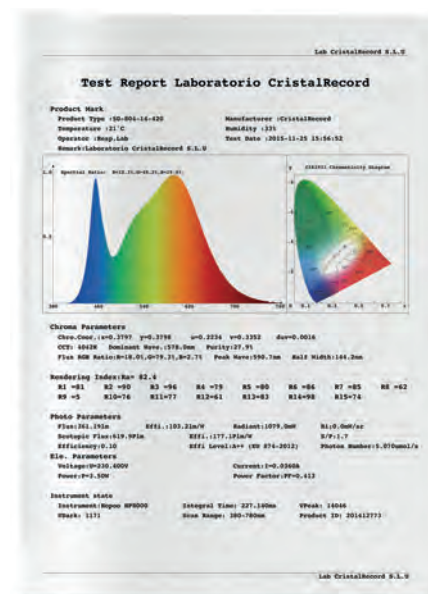

LED lighting market has suffered an exponential growth in the recent years, and the ever changing customers' needs demanding products with improved performance and quality, capable of offering higher Lm/W ratios, does contribute to the development and launch of new products.

As a part of our strong commitment in LED lighting and our efforts in R&D, we have installed our own photometry laboratory equipped with an Ulbricht measuring sphere, with the aim to perform our own products' testings in order to ensure the quality and reliability of our LED lighting solutions.

Testing: Our technicians can test any LED lighting product, of our own or from our competitors, quickly and easily, and get a test report including product's key technical parameters.

Among others, some of the most commonly used parameters to compare items' performances, are:

- Wattage (W)
- Colour Temperature (K°)
- Luminous flux (Lm)
- Colour Rendering Index (CRI)
- Power factor (PF)
