21 ALESSI|SELECTION

HANSA will again be presenting a wealth of new products at ISH 2017. We will be showcasing new ways of thinking, exciting new collaborations and impressive results from the diverse synergies within the Oras Group. All the solutions presented consistently reflect what differentiates the core of the HANSA brand: making your daily life and how you live better – in the bathroom and kitchen, at home and in public spaces.

04 HANSADESIGNO

The completely revised HANSA**DESIGNO** range includes and so opens up unimagined possibilities when delivering challenging, highly individual planning concepts.

06 HANSASIGNATUR

With the expansion of the range, the innovative HANSA**SIGNATUR** series now offers comprehensive creative possibilities for the design of complete bathrooms.

08 HANSA SHOWER SOLUTIONS

Innovative products, a revolutionary system and a completely new shower experience: our innovations provide impressive evidence of HANSA's shower expertise.

14 PROJECT EXPERTISE

HEALTH & CARE, public and semi-public area: HANSA is the expert partner for solutions that exactly meet the complex demands of these highly specialist application segments.

STYLE MEETS HOME

THE NEW HANSAPINTO 16

With its new range, HANSAPINTO always has the right solution for the bathroom and kitchen.

And HANSA 3S-INSTALLATION, the revolutionary system for fast and safe installation makes fitting faster for you than ever before.

HANSAPOLO 18

The modernised and expanded series from the HANSA|HOME segment guarantees the successful equipping of buildings. And it also does everything right in private bathrooms and kitchens.

ALESSI|SELECTION 21

Italian design and German brand quality are equally world famous. Just how perfectly the two sit in harmony can be seen in the results of the exciting collaboration between ALESSI and HANSA, presented for the first time at ISH.

AS MULTIFACETED AS YOUR S HANSADESIGNO

THE EXTRAVAGANT OPTION: HANSADESIGNO ROSEGOLD

A jewel – and at the same time eminently suitable for daily use: The exclusive rosegold option with side-operated variant is the optical highlight of the HANSA**DESIGNO** family. Its slim, almost filigree silhouette imparts a feminine and elegant effect. Beneath the high spout the magic of the new Mikado aerator with its unique mesh of intertwined individual jets comes fully into its own.

The side-operated HANSA**DESIGNO** is also available in chrome. Their variant with a swivel spout impresses everyone with its proud dimensions. It extends the scope of action at the washbasin and this can be extended yet again with the optionally available function hand shower (with optional remote control).

As an individualist you like to surround yourself with things which make it possible to experience the facets of your individuality – especially in personal retreats such as the bathroom.

HANSA**DESIGNO** turns this desire into reality.

HANSA**DESIGNO** is not just a new comprehensive series of designer faucets but a clearly structured multidimensional system of design types, operating principles and functional options – with a uniform concept, strong family DNA and numerous faces. A system which opens undreamed of creative freedoms, but at the same time efficiently directs you to solutions which are appropriate for you and your unique lifestyle.

TYLE:

WASHBASIN FAUCETS WITH A POWERFUL AURA

A classic was rarely as flexible! The single-lever mixer is available in a compact size for smaller washbasins and as an imposing raised base model for wash bowls. The versatile function shower is available as an option for all versions. Details such as the raised spout, which provides extra clearance for the hands, or the cleaning-friendly rear shape of the lever, add to its comfort rating – every time it is used, day in day out.

SENSORY FITTINGS FOR MASTER AND GUEST BATHROOMS

A fitting which reacts to the approach of your hands and allows water to flow only when it is really needed: That is fascinating, hygienic and responsible. With the touchless variants HANSA**DESIGNO** can provide the advantages of electronically controlled fittings for every bathroom – from large to compact. Wall-mounted and concealed solutions create multifaceted design solutions; sophisticated sensor technology guarantees perfect functioning and maximum comfort. The class reveals itself in the detail here as well: In this regard the XS version for example, with its crystalline spray from the Mikado aerator, is also captivating.

DESIGN, FUNCTION AND COM PERFECTLY COMBINED IN THE

It looks different. It is different – fundamentally. What makes HANSAS**SIGNATUR** unique is its ingenious underlying concept; its innovative structure. The functional separation of the lever and spout in two cones set at right angles to each other, each tilted optimally towards the user, creates a washbasin fitting with a completely new ergonomic quality – and a completely new look. A look based on intelligence and visualising intelligence. As a result, HANSAS**SIGNATUR** integrates logically into a modern bathroom design, yet is strikingly distinctive: a fascinating multi-function sculpture.

Absolutely unique is the innovative **HYBRID** model which works manually using the lever or by touchless sensory operation. Water at the pre-set temperature automatically flows when your hands are detected by the sensors – for maximum comfort.

Purely radical, radically comfort-oriented: The concealed variant of the HANSAS**SIGNATUR** washbasin fitting is electronically controlled and battery operated. It works touchless. Water flows as soon as you move your hands beneath the sensor built-in to the spout – at precisely the temperature you pre-set on the thermostat. The rectangular collar, which can be installed upright or transversely, originates from the HANSAM**MATRIX** concealed component system.

The matching bidet fitting completes the HANSAS**SIGNATUR** bathroom – in terms of design, comfort and functionality.

The functional shower extends the usage range of the water source to 1.50 metres around the washbasin. The remotely operated version, activated by a diverter on the shower, is the perfect complement to HANSAS**SIGNATUR** **HYBRID**.

FORT — HANSASIGNATUR SERIES

With the latest generation of the HANSAMATRIX concealed system, the innovative HANSASIGNATUR concept can be transferred from the washbasin to all areas of the bathroom. Unchanged in structure, logic and layout, HANSAMATRIX Tiptronik utilises mains-powered intelligent electronics hidden behind the wall. This provides the basis for a new, intuitive way of controlling bath and shower.

Absolutely consistent design:
The bathtub spout picks up the design language of the concealed washbasin mixer – for a perfectly harmonious overall appearance.

HANSAMATRIX Tiptronik completely redefines user comfort. The intuitive control principle is as simple as it is ingenious: Each function has its own Tiptronik control button. All settings can be controlled simply by tapping and rotating the buttons.

All shower and bath functions are combined in complete HANSAMATRIX units. The reliable electronics of the controls of HANSAMATRIX Tiptronik operating in the background not only ensures perfect comfort. By providing you with a visual indicator, it also helps to make efficient use of resources and save water.

ON THE PULSE  OF YOUR

HANSAEMOTION Wellfit
SHOWER SYSTEM

RECOVER

"My rigorous training programme plus my **Wellfit RECOVER** shower programme: That's what I need to keep in peak fitness."

RELAX

"I start my **Wellfit RELAX** shower programme and everything is washed away: the strenuous day, the tension and the strain."

RELOAD

"I want to start the day full of energy and in a positive frame of mind. My **Wellfit RELOAD** shower programme provides the perfect start."

The perfect private wellness experience is provided by the **HANSA-EMOTION Wellfit** shower system: with **HANSAEMOTION Wellfit** thermostat as centrepiece, swivelling overhead shower and triple spray **HANSAACTIVEJET** hand shower.

Absolutely unique: The system provides all the functions of a hot and cold water body treatment – via three preset programmes, simply at the touch of a button.

THE **RECOVER** PROGRAMME:
KEEP TOP FIT!

For an effective recovery action there are intensive cold water intervals between short hot water phases specifically for the highly stressed parts.

THE **RELAX** PROGRAMME:
LEAVE THE STRSS BEHIND YOU.

Long hot water phases between significantly shorter cold-water cycles quieten you down appreciably.

THE **RELOAD** PROGRAMME:
RECHARGE YOUR BATTERIES.

Hot and refreshingly cold water with a steady rhythm provide the exhilarating effect.

HANSAEMOTION Wellfit: AN OVERWHELMINGLY NEW SHOWER EXPERIENCE.

PULSE SPRAY:

Clustered pulsating spray for focussed treatment of specific zones of the body. E.g. for the **RECOVER** programme.

SENSITIVE SPRAY:

Soft relaxing spray to pamper the whole body. Try this in the **RELAX** programme.

INTENSE SPRAY:

Spray for daily use; ideal for washing long hair. Or start the **RELOAD** programme with it.

THE SUITABLE SPRAY AT THE TOUCH OF A BUTTON:

Change to your preferred type of spray at the touch of a button. You start the **PULSE** function positioned separately and clearly on the top of the shower head.

YOU HAVE THE CHOICE EVEN IN DESIGN:

HANSAACTIVEJET hand showers are available with classic round shower head and as HANSAACTIVEJET **STYLE** version with rounded edges.

The HANSAEMOTION Wellfit thermostat and the new shower heads of the HANSAACTIVEJET family form the perfect “wellness team”: On the thermostat you select one of the three programmes by which hot and cold water acts on your body with certain time intervals. Water temperature and length of intervals are preset so that the hot and cold water body treatment acts to recover, relax or reload.

The programmes selected on the thermostat are implemented via the hand shower. Operation of thermostat and hand shower is simple – you cannot do anything wrong but just enjoy the beneficial effect of the hot and cold water body treatment.

ACTIVATE YOUR HOT AND COLD WATER BODY TREATMENT – SIMPLY AT THE TOUCH OF A BUTTON:

By pressing the Wellfit button (option) one, two or three seconds, you start the desired programme. Every programme starts and terminates with a short adaption phase during which the hot/cold sequences change rapidly. This provides an especially gentle phasing in or phasing out of the programme for your body. Illuminated colour signals on the buttons provide precise feedback on the programme cycle. The programme automatically stops once it comes to the end.

The water subsequently flows in the basic setting previously selected.

You may however terminate the programme yourself at any time – simply by pressing the button again.

DISCOVER

DISCOVER YOUR YOUNG SELF: HANSABASICJET HAND SHOWERS

The new HANSABASICJET family includes two fresh and young hand shower models, which may be combined with all modern fitting ranges. With a diameter of 95 mm, the shower head is relatively large, but still extremely easy to handle. The purists will go for the single-stream variant; if you like variation from time-to-time, the three-stream model is for you.

Put your trust in our quality products – developed and manufactured in-house.

HANSABASICJET

HANSAClassicJET

YOUR NEW SELF!

Our challenge is to make water an experience. Just what different effects water can have on us is nowhere so apparent as in the shower. Which is precisely why 'showering' is one of the key topics for HANSA in the near future. Our internal development and production mean we have the experience and bundled expertise to do things differently. Our innovative products and complete solutions for showering turn the shower into a place of constant inspiration.

Discover your young, vital self: with two new HANSA shower ranges, and a convenient thermostat as the perfect complement.

DISCOVER YOUR VITAL SELF: HANSACLASSICJET HAND SHOWERS

The special shape of the new HANSACLASSICJET is smart: this ensures that the shower can be securely gripped and does not rotate – even when the user has wet hands. This particularly ergonomic handle as well as the highly contrasting visual appearance turn HANSACLASSICJET into the perfect hand shower for cross-generational bathrooms. It is also available as a set with a shower rail, with an integrated hand grip.

You can also choose between two HANSACLASSICJET variants: single-stream or three-stream (stream types: Relaxation, Refreshment and EcoFlow with limits on the amount of water consumed)

COMFORTABLY COMPLEMENTED: HANSAMICRA THERMOSTATS

HANSAMICRA is a modern and young thermostat concept, which offers above-average functionality for this class of products. The shower and bathtub thermostats are perfectly suited to modern requirements – and to the new hand shower families and hand shower sets. For comfort that you really won't be able to do without.

HANSAELECTRA

TOUCH-FREE FITTINGS FOR PUBLIC SPACES

The HANSAELECTRA series has been specially designed for the heavy demands of public spaces. There's the right model and design variant for planners and designers to use in every situation. Fittings with clean or soft lines, available as a pre-tempered water fitting or converted into a cold-water fitting that is either battery-powered or connected to the mains power supply: HANSAELECTRA covers a broad range. Of particular interest is the version with the control fully integrated in the spout. A concealed unit is no longer required (image bottom-right). HANSAELECTRA is also available for the HANSABLUEBOX concealed unit.

HANSAELECTRA is available in different variants – for wall installation or as a traditional washbasin mixer.

APP-SOLUTELY USEFUL: THE NEW HANSA APP.

MONITORING AND CONTROL OF HANSAELECTRA FITTINGS AND OF THE TOUCH-FREE HANSAMEDIPRO MODELS

The HANSA app is an innovative solution designed to make life easier for sanitaryware fitters and building engineers. The effort required for maintenance and setting is significantly reduced. Over a distance of max. 10 m mobile devices and fittings connect automatically via a Bluetooth® ¹⁾ wireless interface.

Free access – e.g.:

Display of product information – Display of the fitting battery life – Display of water consumption – Calendar function for automatic sanitation rinsing – Remote-controlled switching on and off of the fitting – report function for technical documentation

Password-protected area – e.g.:

Setting of the flow duration and flow volume – Control of water consumption – Adjustment of sensor sensitivity – Automatic sanitation and legionella rinsing – Individual setting for each fitting and settings transferred from one fitting to others

2nd level – detail settings

HANSACLIFF

CLASSIC ELEGANCE FOR SOPHISTICATED BUILDINGS

HANSACLIFF was developed in collaboration with hotel designers JOI-Design. Unusual proportions and a graceful appearance make the fitting a true feature. With its elegant design and well-arranged selection, HANSACLIFF is ideal for equipping sophisticated buildings, such as hotels or restaurant, for example.

HANSAMEDIPRO FLEX

NEW: THERMALLY DISINFECTABLE. TEMPERATURE-RESISTANT UP TO +95°C.

With its impressive benefits for care personnel and patients, the HANSAMEDIPRO FLEX has shower has long been established in the Health & Care sector. A new model specially developed for clinical applications is now thermally disinfectable and temperature-resistant up to +95 °C. Like the current models, the new HANSAMEDIPRO FLEX also has a removable shower head base which can be washed – for example in the dishwasher. Unique as before and highly practical is the ergonomically designed, rotatable handle with soft-touch surface which enables exceptionally flexible handling. The shower handle's 360° rotation plane means the hand shower hose is always pointing down, so there is now no need to encircle it.

Fitted with the HANSAPROTEC system, the HANSAMEDIPRO FLEX combines maximum safety and hygiene with the greatest convenience.

The large number of new product variants provides you with a whole new world of opportunities. With HANSAPINTO, you will always find the right solution for your bathroom and your kitchen – without the need for great effort, long and complex searches and costly combinations.

HANSAPINTO variants for the washbasin

HANSA 3S-INSTALLATION: IT'S NEVER BEEN FASTER!

New in the HANSAPINTO range of washbasin mixers:
HANSA 3S-INSTALLATION – our revolutionary
“System for safe and fast installation”.

- ITS ADVANTAGES:
- Only ONE fixing part
 - Components made of the most robust materials
 - Self-locking screw threads for extremely fast and simple fixing
 - Flexible installation on washbasins and sinks with up to 40 mm wall thickness
 - Very simple, one-handed mounting

Thanks to its high levels of efficiency, you will save an enormous amount of time. It certainly pays off!

POSITION.

Installation has never been faster:
1. First screw the installation cone on the fitting to the studs.

HOLD.

2. The special construction means the installation unit already sits firm on its own.

TIGHTEN.

3. Simply tighten it – done.

HANSAPINTO variants for the sink

MORE VARIETY. MORE TIME. MORE PROFIT.

HANSAPINTO

WITH HANSA 3S-INSTALLATION

ALWAYS FITTING: HANSAPINTO IN THE BATHROOM

One of the major advantages of the modernised HANSAPINTO is its versatility. The extended range in this series opens up every opportunity for you to equip complete bathrooms. The variety of models for the washbasin in particular make it easier than ever to deliver on your customers' individual wishes in terms of design and comfort. The different product variants for all areas of the bathroom allow the fitting solution for any situation to be designed easily and consistently, while saving time.

NO STANDARD FOOD: HANSAPINTO IN THE KITCHEN

Simply design bathrooms and kitchens in a consistent design language. HANSAPINTO also offers countless kitchen variants. That saves time when selecting and procuring. In addition to the classic lever mixer there is – now new – a high version with greater projection and an optional pull-out shower.

Also new: a striking side-operated model. The traditional lever mixer and the side-operated model are also available with a shut-off valve – for maximum safety.

Rock-solid:
HANSAPOLO
for the housing sector

Hospitable:
HANSAPOLO
for the hotel sector

Steady:
HANSAPOLO
in the (semi-) public sector

THE NEW HANSAPOLO

THE KEY TO THE SUCCESS FOR YOUR PROJECT.

Opting for the "new" **HANSAPOLO** is a decision which maximizes efficiency from the very outset. The recently extended range makes it possible to equip bathrooms and kitchens in a uniform manner with just one line – and without any time delays caused by the preparation of tendering documents. With various models available for all areas, even the most considerable of demands may be met.

HANSAPOLO is easy to install and maintain, economical when it comes to consumption of water and just as simple to operate as to clean.

All **HANSAPOLO** products embody the premium quality that you come to expect from a brand like HANSA, are state-of-the-art with regards to materials and technology and retain their value over many years – even when heavily used.

HANSAPOLO

FOR THE KITCHEN

The attractive new HANSAPOLLO design not only looks modern and pleasant, but is also suited to almost all interior design styles.

The HANSAPOLLO also cuts a fine figure in private bathrooms. Options include the elegant model with side operation (above) or the XL version (right), which is 20 mm taller and has a larger spout than the classic lever mixer.

HANSAPOLLO as classic lever mixer – with a fresh and functional design (fig. at the top). The version with side-operation is new (fig. at the bottom).

HANSAPOLLO ensures that you get everything right in the kitchen, too. Look no further – our models guarantee a uniform fitting design landscape. Choose between a classic lever mixer with a long swivel spout, a side-operated model and an elegant tall version. The optional shut-off valve offers additional comfort and safety.

INSPIRED BY THE PROS: HANSAFIT SEMIPRO

Anyone who has elevated cooking to a real passion appreciates kitchen technology that supports their high ambitions. It's precisely this professional flair that the new **HANSAFIT SEMIPRO** brings to private kitchens. Both their functionality and looks have been adapted from the high performance fittings of professional kitchens.

In addition to the 'classic' manually operated fitting, there is the high-tech **HYBRID** model which can be operated via the side lever as well as touch-free.

Using the touch-free function means the water flow is activated when the sensor is approached, and stops automatically when you move away from the sensor. That's multi-tasking the professional way.

Professional: the flexible, high spring hose in rubber with soft-touch surface that is secured to the swivel arm with a magnet. The integrated hand shower offer two types of spray for a variety of applications.

THE FITTING FOR EXCELLENT CUISINE: HANSA SIGNATUR

As the creator of a new generation of fittings, **HANSA SIGNATUR** combines an innovative dual design with an intuitive, also dual operating concept and intelligent technology. The absolute highlight is the **HYBRID** model with integrated pull-out shower, also alternatively available as a single-lever mixer featuring manual operator control. Both versions have a 150° swivel spout that can also be set to 70°. For greater flexibility, safety and convenience. For the greatest aesthetic and culinary enjoyment.

The washbasin faucet is opened by pressing gently on top of it, after which the faucet is open for 6 sec. By pressing on top of the faucet for one second, the faucet stays open for one minute. Easy to use temperature control handle which operates also as a flow controller. Also available with function hand shower. Battery operated.

The kitchen fitting with swivel arm, aerator and intelligent dishwasher valve operates on the same principle as the washbasin model. The fitting can also be opened via the temperature controller for the choice of hot or cold water without automatic close. Mains-operated.

ALESSIsense

design Rodrigo Torres

by

ALESSI SENSE by HANSA is a joint project by ALESSI and the Oras Group.

The fitting, which is available for the bathroom and kitchen,

proactively promotes the conscious use of water – and so teaches us to value this precious element.

Design: Rodrigo Torres

NEW DIALOGUE WITH FAMIL

ALESSISWAN by HANSA

design Mario Trimarchi, 2017

"The creative approach of Italian design joins forces with the mission for manufacturing perfection of a German company."

M.T.

The ALESSI Swan by HANSA kitchen faucet is the first fruit of HANSA's collaboration with the "Italian Design Factory" known the world over for its iconic objects.

ALESSI Swan communicates in a new fashion with the familiar gestures we use in everyday life. Ideally drawing their inspiration from the elegance of swans, its organic forms reflect the designer's capacity to produce industrial objects of extraordinary beauty, made to the highest standards of quality and superior performance.

"Its forms call for a gentle a touch, reminding us that water is a precious gift, to be respected and used with care, day after day."
M.T.

ALESSI Swan by HANSA was designed by Mario Trimarchi, the Italian designer known internationally for his capacity to look at everyday objects like sculptures populating our household landscape.

With ALESSI Swan by HANSA he created the most advanced solution for all homes where the kitchen plays a key role. From the functional standpoint, the faucet ensures perfect control on water flow.

Temperature control is by means of a LED that lights up when the temperature reaches 32 °C and emits a red light that illuminates the interior of a lever featuring an embossed finish.

Thanks to a press pad, the faucet can be turned on remotely; this is a handy feature when your hands are full.

In its complete version, the faucet also has an easy-to-use extractable hand spray for washing the dishes.

"My strongest desire is to design objects that can give us a smile, even when we have just woken up."
M.T.

ALESSI SWAN by HANSA

design Mario Trimarchi, 2017

Oras Group is a significant European provider of sanitary fittings: the market leader in the Nordics and a leading company in Continental Europe. The company's mission is to make the use of water easy and sustainable and its vision is to become the European leader of advanced sanitary fittings. The Group has two strong brands, Oras and HANSA.

Alessi, founded in 1921 by Giovanni Alessi, has been able to develop a policy of design excellence which has made it one of the leading internationally renowned Italian Design Factories. It has reconciled its typically industrial needs with its tendency to consider itself as a "research laboratory in the field of the applied arts".
